DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to method with controller and transmitter for determination of communication parameter(s), classified in class 398, subclass 25.
 - II. Claims 18 and 19, drawn to details of receiver including feedback, classified in class 398, subclass 162.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the invention I has separate utility such as device(s) for controlling the parameter(s) and for transmitting the signal such that this process can be performed at the transmitting side. It does not require the details of the receiver required by group II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
